DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Kang et al. (US 2004/0068601; hereinafter "Kang").

Re claims 1 and 3-5: Kang teaches a multi-card data transfer device (110 in figs. 1-4) comprising:

a microprocessor (controller 215 in fig. 2) for controlling and processing actions between each component (paragraphs 31 and 36);

at least two slots (172, 174, 176, 178 in figs. 1-3) each having a multi-card interface, each multi-card interface being electrically connected with the microprocessor and provided for electrically connecting with a memory card and used for receiving read/write commands of the microprocessor for memory cards of various formats of so that the microprocessor can perform read/write actions to the memory card (paragraphs 29, 33-35);

a key module (230, 240 in figs. 2-3) connected with the microprocessor and providing an operation interface for users (paragraphs 26, and 38-40); and

Application/Control Number: 10/772,366

Art Unit: 2876

a power supply providing the required power for each component ("When the computing device 100 is initialed, or powered up, the computing device 100 may query all of the devices electrically, optically, or physically connected t the computing device 100..." paragraph 35) (paragraphs 23-57).

Re claim 2: Kang teaches the microprocessor is further connected with a USB interface (paragraphs 25 and 34).

Re claims 6-9: Kang teaches the key module comprising at least a key (paragraph 32); and a display (operation indicator device 260) used for displaying the operation and use statuses of the multi-card data transfer device (paragraphs, 23, 31-32, 37 and 53-55).

Re claim 10: Kang teaches the microprocessor is further connected with a computer connection interface for connection with a computer (100, 150 in fig. 1) to accomplish bidirectional communication with the computer, and the computer provides the required power for each the component in the multi-card data transfer device (paragraphs 23-35).

Conclusion

Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly D. Nguyen whose telephone number is 571-272-2402. The examiner can normally be reached on Monday-Friday 7:30-4:30.

Application/Control Number: 10/772,366

Art Unit: 2876

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on 571-272-2398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
